

Dear FCC -

I would like to request that you REJECT the NAB's petition, 04-160, that is attempting to stop XM Satellite Radio from broadcasting traffic and weather information. As a subscriber of XM radio I am very pleased to have this service available to me as a PAID subscriber. I pay for the service and should have available to me channels that offer useful and beneficial information that is not available on regular radio frequencies. There is no reason why the NAB should be choosing what is available on a paid subscription service.

In closing, again I ask you to please REJECT NAB's petition 04-160!

Thank You,  
Deborah Morrison
